

Apollo AIO

Countertop Payment Device

FULL-FEATURED. SECURE. ALL-IN-ONE.

The Apollo AIO terminal is an all-in-one payment device that supports magnetic stripe, EMV and contactless payments. An integrated PIN pad, printer and full-color signature capture touchscreen display eliminate the need for extra peripherals and cables. It supports a choice of all leading point-to-point encryption technologies to protect cardholder data. Automatic application updates simplify software upgrades. Apollo can run as a stand-alone terminal, or can interface with a POS system in a semi-integrated configuration.

Apollo AIO

COUNTERTOP PAYMENT DEVICE
