

END-OF-LIFE NOTICE FOR PCI5 LUXE FEATURE RELEASES

NOVEMBER 24, 2025

Dear Valued Partner:

With the continued focus to provide the latest security standards and the best total cost of ownership for our customers, Equinox invested early to enable its customers to migrate to the PCI6 security standard. Although PCI Security Standards Council (PCI SSC) decided to extend the expiry for PCI PTS version 5.x devices until April 30, 2027 and provide terminal providers greater time to enable the migration, Equinox is ready ahead of schedule to enable the migration today. Given the enhanced security standards, Equinox is proceeding with its scheduled end-of-life (EOL) for PCI5 Luxe Platform Versions and Software bundles for the Luxe 6200m and Luxe 8500i. Equinox encourages customers to upgrade to PCI PTS v6.x software and realize these benefits. Here is a summary of the end-of-life plan and upgrade information along with suggested options:

PCI PTS 5.X END-OF-LIFE AND MIGRATION DETAILS

- **Original PCI PTS 5.x expiration:** April 30, 2026.
- **PCI SSC extended expiry:** The PCI SSC has extended the expiry date for devices already approved under the PTS POI v5 standard to April 30, 2027.
- **Equinox's plan:** Equinox will continue its planned EOL for the PCI5 Luxe Platform versions to ensure we transition and provide the latest security standard (increased security standards outlined below) as well to extend life of deployed terminals in market. The company has already transitioned its manufacturing to PCI PTS v6.x devices and is preparing for a future upgrade to PCI PTS v7.x.
- **Migration recommendation:** Equinox is encouraging customers to migrate the Luxe 6200m and Luxe 8500i to PCI6 software as planned. This upgrade provides a higher level of security, particularly for symmetric encryption keys using TR31 key blocks.

BENEFITS OF MIGRATING TO PCI PTS 6.X

Upgrading to PCI PTS 6.x offers a range of security and operational improvements, including:

- **Enhanced key security:** Stronger protection for the transmission and storage of symmetric encryption keys using the more secure TR31 key block format.
- **Longer compliance window:** The Luxe 6200m and Luxe 8500i are PCI PTS v6.x certified, with compliance effective through April 30, 2032.
- **Protection against evolving threats:** PCI PTS v6 was developed to combat new methods of data theft, including physical and logical attacks.
- **Support for modern technology:** The v6 standard introduced or enhanced support for features like Elliptic Curve Cryptography (ECC) and software-based PIN entry, which keeps devices current with new payment technologies.

END-OF-LIFE NOTICE FOR PCI5 LUXE FEATURE RELEASES

NOVEMBER 24, 2025

LUXE PCI5 TERMINALS END-OF-LIFE

Equinox will *cease manufacturing* of PCI5 Luxe terminals after April 30, 2026.

Be assured, Luxe PCI5 terminals in the field may continue to function and can be updated to PCI6 with *Payment Engine Feature Release 6R63.0* (or higher) or *Voyager Feature Release 6R14.0* (or higher). All current EMV Kernel groups are available in both PCI5 and PCI6 software bundles (SW) and application software versions. Additionally, EMV certifications are not required to support PCI6.

LUXE software (SW) bundles, which include *PCI5 Platform versions 2.X.X-X* will no longer be installed for NEW terminal shipments. Furthermore, the repair process will not change, so terminals sent in for service will be returned with the platform software that was on the terminal when it was received.

LUXE PCI5 FINAL ORDERS

EFFECTIVE JANUARY 31, 2026

In order to fulfill orders for Luxe PCI5 8500i and 6200m terminals in advance of the PCI5 expiry date, all orders must be submitted prior to *January 31, 2026*. Please consult with your Equinox Sales Director to ensure timely delivery.

LUXE PCI5 SOFTWARE END-OF-LIFE

EFFECTIVE APRIL 30, 2027

All NEW features and functionality will be applied **only** to PCI6 Platform software. All NEW Feature Releases will be only for Luxe PCI6 Platform software. Maintenance Releases will address Critical Bug fixes and will continue to be available for Luxe PCI5 Platform software through the end-of-service date

LUXE PCI5 END-OF-SERVICE

EFFECTIVE APRIL 30, 2028

All maintenance and support for Luxe PCI5 Platform software will be discontinued. Maintenance Releases for PCI5 Platform software will no longer be available. All Bug fixes will be addressed only in PCI6 Platform software. Additionally, the repair process will not change, so terminals sent in for service will continue to be returned with the platform software that was on the terminal when it was received.

END-OF-LIFE NOTICE FOR PCI5 LUXE FEATURE RELEASES

NOVEMBER 24, 2025

OPTIONS

We highly recommend that you and your customers review your deployed Luxe software and determine the best plan forward considering the following options:

1) **Continue using PCI5 Luxe software.**

A deployed Luxe solution will continue to operate using PCI5 software bundles.

2) **Update to PCI6 Luxe software.**

Equinox offers, for a small fee, in-field upgrades of Luxe terminals from PCI5 to PCI6. Your terminal estate can easily be upgraded to PCI6 without the need to take them out of service and send them in for an upgrade. This upgrade is accomplished by downloading and installing the PCI6 Platform software. Since our PCI6 Platform software contains the same EMV kernel groups, a new certification is not required.

Equinox understands there may be additional questions and we stand ready to answer any questions and help you with the transition to newer Luxe software. Please contact your Equinox Sales Representative directly or email Equinox Customer Support at ProductSupport@equinoxpayments.com.

Best Regards,

Robert Hayhow, Vice President
