LUXE™ 6200m

| Mobile | Mobile + Printer | Wired + Stand | Wired + Printer | Wired |

VERSATILE DESIGN

The Luxe 6200m breaks the mold of "purpose built" terminals by leveraging a unique, modular manufacturing design. Combine communication and connectivity options aligned with particular use cases, including:

- Bluetooth® Low Energy, WLAN, 4G LTE, Ethernet, Dial, USB Type B, Powered USB and combinations of each.
- Wired or battery-operated power module with optional printer.

SMART ARCHITECTURE

This is no simple PIN pad. The Luxe 6200m features plenty of memory to run a full suite of payment and value-added applications and is designed to put software developers in charge.

- Supports stand-alone, integrated and semi-integrated POS interfaces
- Extends the ability to leverage applications across all Luxe models/configurations
- Eliminates expenses related to extra third-party application layers

ROBUST SECURITY

The Luxe 6200m meets the most stringent security standards. It is PCI PTS 6.x certified and PCI P2PE v3.1 validated for Domains 1 & 5.

- Payment and value-added applications can securely co-exist in the device, each running in its own domain
