# VOYAGER

One app. Any Segment. All devices.

Stop juggling multiple solutions for every vertical market and acceptance method. The robust Voyager application runs on all Luxe devices and supports features for any business environment.

Voyager can be leveraged across devices, markets and use cases, simplifying integration, certification, configuration, training and support. The application scales to meet the needs of everyone from a small business owner to a multinational enterprise or franchise organization.

Our simple API allows you to interface with any POS solution in no time. Best of all, no payment certification or expensive training is required.
